Knowledge To Wisdom. A Guide To Becoming Spiritual

Believe it or not, living spiritually is easier than you think. Why? Because your spirit is replacing your mind that loves being a god. Being a god is too much work!

Spirituality is a growth process. Mistakes are always made, but by your awareness of a couple crucial understandings, progress is made by living with less negativities, and understanding that God has total control over all of creation, although virtually nobody thinks so.

1) By understanding that sin, evil, negativity, and iniquities have their purpose, there is no need for judgement. Period. Therefore, slowly change your mindset to neutralize any thoughts other then from your understanding whatever it is, is supposed to happen for in the end, it's for the greater good. God's plan is perfect and yours is not.
2) All actions, words, and thoughts need to be processed with the awareness from a love aspect and nothing else. If that can not be done, simply let it go and revert back to neutralizing the thoughts and let it go.
3) Understand that you are a perfectly created spirit from God. God is in you, and you are in him. Your spirit has been placed in a flesh body to live from your self in total freedom. To live with choices that determine your heaven and hell within your own individual self with the uniqueness of mind in a one on one relationship with God. Everyone else has the same relationship in their own way. Respect it.
4) The connection between your spirit and the rest of creation is like this; love your neighbor as your self, forgive your self and your neighbor. Once that is accomplished, live right now as if everything was anew. You in whatever way, to whatever depth, are not the same person you were yesterday. Neither is your neighbor.

As you master the above, you will find more freedom within your mind and heart. You actually feel like a lighter person because your living from the light and not from the dense darkness. God, Jesus, and the Holy Spirit has total control.
Your awareness in living comes from within that perfectly created spirit right through the flawed flesh mind-ego-god perspective.
After all, you didn't create anything, nor can you create anything.
